Dear Nurse

Re: Mrs Monica Osburn, a 69 years old female.

I am writing to refer Mrs Monica Osburn, a 69 years old, who has been diagnosed with Hypertension and depression. She needs your monitoring on medication compliance, alcohol intake and diet.

Mrs Monica Osburn has a history of Hypertension since 10 years and depression for 2 years, and she has been taking Anti-hypertensives medication as well as anti-depressants. However she has a periodic problems with self-administration of medication. So she needs to be monitored for medication compliance.

Mrs Osburn has a long history of taking excessive amount of alcohol whenever she gets on mood. So needs to be constantly monitored for her alcohol intake as well as her diet.

Please record your answer on this page.

Mr Osburn lives alone. So it would be great if you could manage some social activities such as encouraging her to join elderly citizens' clubs, as well as involving her into voluntary groups. In addition please note she needs to be kept in touch with medical practitioners.

If you need any further information regarding this course then do not hesitate to contact me.

Yours sincerely

Nurse
