Tom Wilson

Community Health Nurse

Community Health Centre

Newtown - 5708

25 August 2018

Re: John Samuel, aged 26 years

Dear Mr. Wilson

his left ear for which 12 stitches were applied.

I am writing to refer Mr. Samuel who was diagnosed with hypoglycaemia episode and possible concussion GCS of 13 with 12 sutures of laceration and he requires your support and monitoring regarding compliance regarding his condition. care for his wound and

Mr. Samuel came to Newtown 2 years ago for further study and lives with two of his friends in rental housing. However, he often buys take away food and he cooks his own meals sometimes. In addition he is very sociable and plays football for local team. He has a habit of visiting pub with friends and often binge drinks.

Regarding his past medical history he has a history Type 1 diabetes which was diagnosed 6 years ago. He also has a history of non-compliance with dietary regime since he moved to Newtown for his studies.

Mr. Samuel was admitted to our hospital after a hypoglycaemic episode while playing football on an empty stomach. Apparently, he hit his head with another player following a collision. Therefore, we provided him ice packs to reduce his swelling. Moreover we also provided him subcutaneous insulin on sliding scale according to blood sugar levels also monitored his blood sugar levels were 6 hourly and neurological observations 2 hourly. His wound has been managed well and he has commenced diet regime as well as diabetes education

with a dietician input and a diabetes educator provided him education regarding his condition.

~~by the help of dietitian and educator.~~

Mr. Samuel is ready to be discharged now. His wound is dry and has good knowledge of his condition as well as insulin therapy. His weight is also at normal range of 70 kg and has good dietary compliance. Kindly refer him to visit with drug and alcohol counsellor and provide follow up support to ensure continued dietary compliance. Note that his sutures to be removed in 4 week.

It would be greatly appreciated if you could do follow up visit and support him for continued dietary compliance and provide care to him accordingly.

If you have any questions. Please feel free to contact me.

Yours Sincerely
Nurse.
