Dr. Harry Moxham
Psychiatric Registrar
Bayview Hospital,
89 Canyon Road,
Bayview

18/09/2024.

Dear Dr. Moxham,

Re: Mrs. Sheila Wikes

DOB: 02/02/1949.

How can the whole department do this? odd meaning!!

I am writing to refer ~~you~~ my patient, Mrs. Wikes, who presented to the Emergency Department escorted by paramedics and police after being found unconscious in her bedroom.

Where's the purpose? 0/3

On examination, her BGL was 1.8, BP was 90/60 mmHg and pulse was 62 b/minute. ~~The emergency department then started her on antibiotics, and sent for baseline investigations. Mrs. Wikes had missed her appointment the very day and had not picked up her calls. Upon inquiry, her neighbours stated that she had not been seen for the past 2 days.~~

Where's the first visit?

odd sense!!

Disorganised paragraph!!

She is now stable and has been moved to the medical ward. However, she seems agitated, constantly crying for her family and wanting to die. Her speech is slurred, she is unsteady on her feet, increasing her risk for falls and has been refusing food and fluid.

She also has been non-compliant with her oral medications.

Should attach to a paragraph!!

Mrs. Wikes, came to me 5 days ago with complaints of feeling low and confused. On further investigation, she was diagnosed with urinary tract infection.

Should be at the end!! (before request!! conclusion!!)

and was prescribed Trimethoprim 1g for 5 days.

Mrs. Wikes, previously, had history of postnatal depression. She lives alone and her husband is in a care home after suffering from dementia. She has two children who live abroad and are hard to contact.

She was also diagnosed with Diabetes Mellitus (1990), HIV (1999) and underwent tonsillectomy (2000). She was treated with antibiotics for water infection. (2004.)

Her blood reports came back normal, so we plan to continue treatment for now. We have also planned to refer her to social services for assessment and funding for nursing care.

In light of above, I hope you assess the patient promptly due to her high risk of suicide. Please don't hesitate to contact me for further details.

Yours sincerely,

Dr. Samikshya Bhandari.

① Intro → must have purpose!! (3 points)

② Back ground info summary.

③ 1st visit summary!!

④ 2nd visit summary / help adm.

⑤ Today's status

⑥ Conclusion Request.

① = $\frac{340}{520}$

* Write coherent and logical paragraphs (unity!!)
